Bamboo Taupe
LB296

Bamboo Natural
LB295

Bamboo White
LB297

Made from 100% bamboo fiber, these 300- thread count sheets are exceptionally comfortable. The bamboo fiber is naturally soft, and it “breathes” to release heat and moisture. Its natural anti-bacterial properties make it an ideal fabric for hot, humid nights.

As an added benefit, Bamboo fiber is environmentally friendly and is grown without pesticides and other harmful chemicals and if cared for naturally, will be extremely kind to users with asthma, allergies and chemical sensitivities.

BENEFITS OF BAMBOO:

EARTH FRIENDLY

The fabric is woven from a very renewable resource and is fully bio-degradable

COOLER AND DRIER THAN COTTON

The fibers in Bamboo wick away moisture up to nine times faster than cotton, making this the perfect fabric for people who experience hot flashes or who tend to perspire in their sleep.

NATURALLY ANTI-MICROBIAL

Bamboo fibers kill bacteria, fungus, and microbes, which in turn keeps them virtually odor free between washing. Enjoy a cleaner, healthier sheet.

SILKY SOFT TEXTURE

Similar to rayon or silk in feel, bamboo has been compared to the highest thread count cotton textiles.

The sheets are 300-thread count, with a silky drape. The cotton is 100% eco-friendly, and no chemicals are used in the growing, finishing or dying processes.

Sheet sets include pillowcases.

Certified Organic Cotton has been grown, harvested, and processed according to these Earth-friendly standards:

- Avoidance of most synthetic chemicals in fertilizers, pesticides, and dyes.
- No genetically modified or enhanced seed
- Use of farmland that has been free of chemicals for a number of years
- Careful audit and supply trails, combined with annual inspections to ensure compliance to these standards.

Recommendation: Swatches of the fabrics before selection is determined.

Bridal Satin

The shiny finish is a result of calendaring, which is essentially rolling a huge hot roller over the fabric. Sateen isn't the only fabric that undergoes that part of the process, but all sateen's do. In the wrinkle free (T-600) fabrics, this finish is very durable, thanks to the micro-silicon treatment they also undergo. In other sateen's, this luster tends to fade after a few washings.

The silky, sumptuous hand of these 600-thread count 100% cotton sateen is as luxurious as it is practical. The easy care, wrinkle-free finish makes these sheets one-of-a-kind.

Some fabrics have a higher finish than others, one would probably find that even some sateen's will be acceptable.

100% Cotton and Sateens, on the other hand, are more difficult to maintain. They should be washed in cold water, and line or tumble dried. They do tend to wrinkle, and can be expected to shrink 1-2% the first time they are washed. This shrinkage is taken into account when the sheets are manufactured. For this reason, they may fit loosely before laundering, and provide a snug fit afterwards.

Keaton Collection

Collection: Niche EA Collection

Available in: Bedsets, Duvet Cover, Comforters, Bed Skirts, Accent Pillows, Curtain Panels

Keaton breathes life in vivid yellows and greens. Whites in the pleated bed skirt, Euro sham, and tambourine pillow imply a view of the sky through a canopy of trees. Pleated stripes on the shams and a cherry blossom motif suggest a slight Asian influence in design. A decorative graphic ribbon design runs along the edge of duvet and along three sides of the pesto rod pocket curtain panel. An alternate panel repeats the cherry blossom theme of the boudoir.

A calm palette of gray and white sets the tone for Mirren. Defining the duvet (and comforters), curtain panels, and bed pillows is a graceful, printed floral scroll on the main fabric.
